Circulation 49 July 16, 1975 Special Issue

The contents of this 'special issue' will be repeated in the normal July issue to be mailed the last week of July.

NEW SYSTEM AVAILABLE

The Sixth Edition - June 1975 of the UNIX system is now available for distribution to licensees. Commercial users should contact Western Electric for details. Academics can receive the new system for a minimum charge of $150.00. Normal distribution is on 800 bpi - 9 track tape. You can send a tape, and a check for $150.00 addressed to:

C. W. Christ, Jr.
Room 4F313
Murray Hill, N. J. 07974

The tape contains a single file which extracts into a file system equivalent. The contents:

(rm.0) The system source (no binaries)
(usr.1) /usr/source
(usr.2) Documentation, as troff input (no binaries)

The required distribution on RK-packs should be available by [illegible]. The packages also contain the [illegible] system.

Some of the new 'goodies' are:

- Separate I and D areas for the 11/45s and 11/70s
- User files (up to 16 megabytes)
- A preprocessor for structured Fortran
- Ratfor
- A preprocessor for SCOPE with an [illegible]
- Pipes, tees and redirection of standard input and output
- Automatic maintenance of libraries
- Date and time of last modification of each file
- [illegible]
